

NATIONAL ASSOCIATION OF EDUCATIONAL BROADCASTERS

Ames, Iowa
December 20, 1948

TO OFFICERS AND DIRECTORS:

Enclosed are 6 copies of the revised NAEB membership list. Each of you will note certain errors within your district which we have not been able to correct. There are also several errors which we should have corrected. For instance:

Region I WCUV-FM, Columbia University, has cancelled its CP, but is paying active dues through remainder of the year.

University of Maryland--Dr. Melvin White, the former radio head now has a similar position at the University of Hawaii. New head not known.

Region II Maryland Wilson is on leave, but the membership is held. Wilson is at the Nurnberg Dependent's School, Nurnberg Military Post, APO #696, c/o Postmaster New York.

University of North Carolina radio head is not known.

Region III WBOE, Cleveland Board of Education. Levenson is now asst. supt. of schools and Ed Helman is WBOE director.

Region IV KUON, University of Minnesota, Burton Paulu is on leave. Ruth Swanson is acting director.

Region V O.K.

Region VI University of Hawaii. List Dr. Melvin White instead of Joseph Smith.

I am enclosing six copies of a descriptive paragraph which might be used as the basis for a letter in soliciting membership. If you desire I will have an extra run on the next Newsletter, so you have this to distribute for samples.

It will be appreciated if each of you can check your region for accuracy as you proceed with membership campaign plans. It would be further appreciated if you send carbons of all contact letters to John Dunn, vice-president, who will head membership arrangements (and whose previous record of skill in this area shows in Region V of which he was one-time director) and carbons also to W. I. Griffith, recording secretary and treasurer.

John Dunn will probably bear me out in the suggestion that each regional director could well follow the FCC section (as well as reviewing older copies) for news of educational station action in his region. Current issue has several new applications.

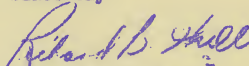

#2 OFFICERS AND DIRECTORS

A revised schedule of dues is in process of formulation, although the present rates still apply and will for any new member for his full initial fiscal year with NAEE.

A station with a CP should be written into any membership arrangements as an active member.

Best wishes of the holiday season.

Sincerely

A handwritten signature in dark ink, appearing to read "Richard E. Hull". The signature is fluid and cursive, with the first name "Richard" and last name "Hull" clearly distinguishable.

Richard E. Hull,
President

RBH:CD

Enc.

September 10, 1948

Mr. T. J. Slowie, Secretary
Federal Communications Commission
New Postoffice Building
Washington, D. C.

Dear Mr. Slowie:

The National Association of Educational Broadcasters is very much interested and concerned in the forthcoming hearings on television allocations before the Federal Communications Commission.

I am certain the organization will wish to make a statement with respect to the allocations plan, and the possibility of reserving some portion of the TV spectrum for educationally-owned video outlets, perhaps on somewhat the same basis as the present FM channels set aside for educational and non-commercial use.

The information I presently have, states that the TV hearings begin on September 21, 1948 before the FCC. I have also heard it reported that because of the amount and kind of technical data required, that these hearings may open and recess for later continuance.

My difficulty is that I cannot request an appearance for the September 21 date, or any time shortly thereafter, for the reason that the National Association of Educational Broadcasters does not have its annual business meeting until October 12, and I will be unable to get authorization for an appearance or a statement until that time. Nonetheless, several of our members have indicated an interest as I suggest above, and it seems important that a statement be made.

N-A-E-B is concerned that FCC and other interested parties do not misconstrue the lack of positive action in the television field as a case of college and university standard broadcast "history repeating itself."

N-A-E-B does not regard the situations as analogous. While colleges and universities failed to enter as vigorously as they should have into the AM broadcast field, it was more a matter of lack of perception than cost. In the case of television, the fundamental barrier is excessive capital investment in a communications field, which can still for all practical purposes, be regarded as experimental.

It would indeed be unfortunate if education in the U. S. at some future date, were to be permanently penalized for failure to "prove out" channel facilities in a field which is excessively costly to enter and which is in many respects still in the developmental field.

I will appreciate hearing from you.

Sincerely,

Richard B. Hull
Richard B. Hull

TO: OFFICERS AND DIRECTORS OF THE N.A.B.B.
FROM: RICHARD B. HULL, PRESIDENT
RE: SOUTHERN BAPTIST PETITION

Enclosed is a copy of a letter from our attorney, Marcus Cohn, and my reply--whose partner, Leonard Marks, filed the previous petition for the Southern Baptists which created the situation about which we have all been concerned.

Enclosed also is a supplemental petition filed recently by Mr. Marks which, in my opinion, removes the specific issue about which we are concerned. With the Baptists now having removed themselves from the 88 to 92 megacycles and competing on the same terms as others in the commercial FM band, the situation is, as far as I am concerned, settled.

I would appreciate your comments.

R. B. H.

MEMORANDUM

TO: N.A.E.B. Officers and Directors

FROM: Richard B. Hull, President

RE: N.A.E.B. Incorporation and Southern Baptist 10-Watt Petition

A. N.A.E.B. Incorporation -- There is a possibility we may get financing from a foundation. To officialize such a grant, it is necessary that N.A.E.B. be duly incorporated as a non-profit corporation in order that the contributor may avail himself of tax-exemption by gifts to such a corporation. Since the University of Illinois some years ago was designated as our official headquarters, W. I. Griffith asked Frank Schooley at WILL to investigate methods and cost of incorporating in Illinois. Cost is only \$10.00. Legal processing can be furnished without charge by University of Illinois lawyer. There is some reason for haste if we secure monies within the 1949 tax year. Will you vote and add any comments you wish?

APPROVE _____

DISAPPROVE _____

B. Southern Baptist 10-Watt Petition -- A copy of FCC docket No. 9740 is attached representing the joint petition of the Radio Commission of the Southern Baptist Convention and the Executive Board of the Baptist General Convention of Texas, and announcing oral argument for same. In essence they ask the FCC two things:

1. FCC grants of FM low-power frequencies for non-commercial, religious stations similar to educational low-power grants.
2. FCC grants of such stations either in the 88-92 mc. educational band, or new rules allowing such grants elsewhere in the FM spectrum.

Attached are copies of letter from Clifford Durr, former FCC Commissioner, and Everett Parker, Director, Protestant Radio Commission, which are self-explanatory.

The situation is highly confusing because Leonard Marks of Cohn and Marks is the Baptist lawyer; whereas Marcus Cohn of the same firm is our attorney. This contradiction was discussed at our annual meeting and discussed with Cohn, who is willing, if necessary, to oppose his partner.

At that time, the group voted to oppose this informally with the FCC as we had done previously. The issue, I am told, in the FCC's eyes, is the First Amendment and free speech. Privately, I understand, the Baptist petition may be rejected.

Apparently this is not certain, nor have our actions been positive enough. If it is your desire and wish to authorize me to proceed actively in this matter, I will do the following things:

1. Contact the FCC and apply for hearing time.
2. Discuss the matter with Cohn.
3. If necessary, get another attorney to act for us in this instance.

Please vote and comment:

PROCEED ACTIVELY _____

PROCEED INFORMALLY _____

C. Membership -- Enclosed is a copy of our new official membership list and directory. Under separate cover, you will have received a map of N.A.E.B. members. You will notice associate memberships have fallen off. The Office of Education now reports a total of 118 educational stations, FM and AM. This means many new FM stations are not in N.A.E.B. membership.

Will you please review your FCC actions and applications in this year's News - Letter (back issues) and watch your newsroom teletypes for announcements of FCC grants and bring some of the brothers in?

Will each regional director also set up some sort of routine to contact each station at least four times per year for public relation's sake and, also, get placed on each station and member's mailing list and set up an appropriate file to cover station business within his region.

A director can also be of immense help to our new News - Letter editor, Burton Paulu, if he will keep pushing stations to send news to Paulu and, also, undertake to furnish a due gist of it himself for his own station and region.

PLEASE REPLY IMMEDIATELY ON THE VOTES. TIME IS RUNNING OUT.

R. B. H.

RADIO DEPARTMENT

of the

BAPTIST GENERAL CONVENTION OF TEXAS
Baptist Building Dallas 1, Texas

11 February 1949

Mr. Richard B. Hull
President, N.A.E.B.
Iowa State College
Ames, Iowa

Dear Mr. Hull:

I appreciate very much your letter of February 2 inviting me to write an article for the N.A.E.B. Newsletter. I am inclosing the article with this letter and hope it is satisfactory.

In the past, I have corresponded with your executive secretary Mr. Morris S. Movik of New York, and in our correspondence I have told him of our work. I tried to contact him when I was in New York City last December, but was unable to do so.

I do believe that our organizations have something in common with reference to FM broadcasting. In the first place, I believe that low power FM is the answer to getting FM sets in the home. Our Texas Baptist Radio Department is sponsoring some nine or ten FM commercial stations here in Texas. We now have seven construction permits, with one of the seven on the air, KMHB, Belton, Texas. FM here in the South has not developed as fast as it has in your section or in the East. People do not have FM sets to listen to the broadcasts. Standard Broadcasters have not helped FM by giving one-hundred per-cent duplication of their AM stations. Here is where I believe low power FM comes in for the churches.

It was not my idea to get low power FM transmitters only for Baptist churches but for all churches, and our petition now before the FCC in Washington, or that will be before them within the next week, so states that it is for all churches. I would certainly like for your organization to have an understanding of what we are trying to do, because we are asking that these low power FM sets be in the 88 to 92 megacycles, which is the educational band. I cannot see where there would be any conflict between colleges and schools working together with churches sharing frequencies. In other words, the church will do most of their broadcasting during the week days. In this way they could share frequency, and certainly the time could be worked out to a mutual understanding and to the benefit of both. I do not believe there is any organization that can get more FM sets in the homes in a city than the churches can.

It is our plan to help all of the pastors who are granted low power FM channels in every way possible. We intend to have a school to instruct them in the type of programming that will be of interest to not only their congregation but to everyone. It is our aim to show them how they can use their boys and girls in type broadcasts that will be of interest to the children and the parents. Such broadcasts will cause mothers and fathers whose children are on these broadcasts to buy an FM set and listen to this frequency.

It seems to me that here is an opportunity for us to work with your organization, and that the two of us combined can make FM a coming type of broadcast over the entire U.S. area. Those of us who are familiar with FM know that it is the best type of broadcast and that the only reason it has not succeeded is because we have not had enough FM sets in the homes and because FM stations have not done a real job in programming.

We have considerably over 200 churches who have already signed up to make application for low power FM. This is a very small start on the number that will want to make application when they know about it. It can be a tremendous thing for FM in the future. I would like for your organization to have a complete understanding of what we are setting out to do. I would be happy to come and meet with you or some of your executive officers that we might sit around the table and discuss these plans and any problems that might arise. I am positive the FCC will get in touch with your organization when our petition has been presented. I want you to have a complete picture, and when you have that picture I believe that you will see it will work to the advantages of the schools and colleges as well as to the churches.

Thanks for sending me a copy of your N.A.E.B. News Letter. I would like to be put on your mailing list if that is possible.

Yours very truly,

/s/ R. ALTON REED

Director

- LOW POWER F.M. FOR CHURCHES -

A petition, the approval of which would mean that churches of all denominations could operate their own 10-watt FM radio stations, is now ready to go before the Federal Communications Commission, Washington, D. C. The petition, filed by Dr. R. Alton Reed for the Southern Baptist Convention of Texas, calls for opening of the radio educational band to religious groups.

The movement for the low power frequency modulation units began after the October meeting of the FM Association, where considerable interest was manifested in the Serrasoid Modulator produced by Radio Engineering Laboratories. Dr. Reed, director of the department of radio for the Texas Baptist Convention, saw in the low power FM transmitter an opportunity to benefit both church groups and the cause of FM.

Churches of all faiths throughout the nation could set up for less than \$2,500 their own broadcasting stations. Because a church was broadcasting on FM, the membership of that church would be more likely to purchase FM sets, thereby making FM more profitable than it has been in the past.

At its annual convention in Houston in November 1948 the Baptist General Convention of Texas adopted a resolution asking the Federal Communications Commission to allow churches to broadcast on low power FM in the 88 to 92 megacycle band. Later the resolution was presented to the radio commission of the Southern Baptist Convention, where it was unanimously approved. These two organizations, representing more than six and one-half million Baptists, secured counsel in Washington and prepared the petition to the FCC not only in the name of Baptists, but in the name of all churches.

It is asked that the application forms for the 10-watt FM stations be simplified so that they can be answered by laymen without the service of a local engineer; that the installation of such stations be simplified so they can be operated similarly to a public address system; and that the antenna be a simple one-ring affair.

More than 200 Baptist Churches in Texas have already signed tentative applications indicating definite interest in the small stations. "It is the hope of the denomination," declared Dr. Reed, "that every community of 1500 population and more will seek to have these low power FM sets in the local churches.

"Where there are schools and colleges in the community and there are more who want broadcasting stations than there are channels available, it is hoped that those churches and schools wanting transmitters will work out a plan to share the same frequency." There is no conflict in this, he pointed out, because schools would be broadcasting during the daytime, and churches would do most of their broadcasting on Sunday.

"Every indication leads to the fact that these low power FM stations for schools and colleges and for churches have opened up a new field of broadcasting which will give the life blood to frequency modulation that it has needed. There is no doubt that it is the best type of audio broadcasting."

NATIONAL ASSOCIATION OF EDUCATIONAL BROADCASTERS

March 7, 1949

TO OFFICERS AND DIRECTORS,

Enclosed is a copy of a letter from the Baptist General Convention of Texas to which I urge you give your very serious consideration and react to me as soon as you conveniently can.

You have doubtless noticed in the trade journals that this church group is expecting to apply for some 200 low power FM broadcasting stations. Obviously, they hope to secure space on what is now known as the educational FM band.

On the positive side, such a development would vastly encourage the sale and use of FM on a non-commercial basis. At the same time it is evident that religious broadcasting as such is not necessarily educational broadcasting.

The traditional attitude of NAEB has been to oppose approval of membership for any religious station which is not affiliated with an accredited college, school or university. The intent has been clear--to eliminate what might be termed the "rabid fringe".

However, in the present instance we may well find ourselves in somewhat of a "dog in the manger" position. Through the vigorous efforts of a number of educational groups, including NAEB, twenty channels were designated as non-commercial FM channels and set aside for such use in the range of 88 - 92.

It is unfortunate that to date these frequencies have by no means been taken up by educators, and despite the fact that many of us know of several score of prospective applicants, official action has been taken only by those listed in the last News Letter. Recent and unofficial reports from the FCC indicate that we would be making an insane and impossible gesture if we apply for a so-called "educational band" on the television spectrum.

Now, with educators having used less than half of the available FM frequency, if we categorically petition the FCC to deny the Baptist Convention these frequencies for non-commercial use, we will be able to show little justification and are quite likely to be overruled.

I will appreciate your reactions as to how this situation may be met. It has occurred to me there might be some merit in voluntarily relinquishing two or three of the channels in the so-called educational band in favor of applicants of this type and not making the distinction officially for the FCC between educational and religious groups. It seems some statement of this kind must be brought to the attention of our general council and to the FCC, or we shall yield the point by default.

RICHARD B. HULL
PRESIDENT

NATIONAL ASSOCIATION OF EDUCATIONAL BROADCASTERS
Radio Station WOI, Hdqrs.
Ames, Iowa

March 7, 1949

TO OFFICERS AND DIRECTORS AND MEMBERS OF NAEB INVOLVED IN CLEAR CHANNEL CONFLICT:

Enclosed are four documents:

- A. A subcommittee report by Senators Tobey and McFarland of the Interstate and Foreign Commerce Committee which gives the clearest picture of the non-technical issues in American broadcasting today in the opinion of your president. (This deserves your serious study because it affects you, not only as a station involved in the clear channel dispute, but in a much larger sense.)
- B. A copy of a speech given at the anti-clear channel meeting in Chicago January 28 by Senator Edwin C. Johnson, Democrat Colorado, Chairman of the Senate Interstate and Foreign Commerce Committee.
- C. A bulletin entitled "The Clear Channel Question" which contains an analysis of arguments presented in favor of, and opposed to, use of clear channel frequencies by more than one station in the United States. This was prepared in the law offices of former Senator Burton K. Wheeler.

The Chicago anti-clear channel meeting brought together 70 individuals who collectively represented more than 139 stations, all opposed to continued clear channel dominance.

It became abundantly clear at this meeting that the clear channel question is not one of serving two "white areas on a map", but rather a pure and simple question of monopoly--in other words, the big stations, 24 of them, want to keep what they have and get more.

NAEB was represented by Director Higgy of WOSU, Ohio State University, and by your president. H. H. Leake, Oklahoma A & M. Radio Director, was prevented from attending by a weather-bound train. Mr. Higgy and I decided that NAEB should cooperate closely but not affiliate itself with the anti-clear channel group in Chicago. Arrangements have been made to keep in touch with delegates of this organization. Direct reports to me from intimates of Senator Johnson give every indication that he is a man to be respected and trusted in this struggle against monopoly. Those NAEB stations directly involved should study carefully the material enclosed and make due and conscientious effort not only to contact, but to explain to their representatives in congress the significance of this situation and how it affects them.

A report of any activity undertaken will be greatly appreciated here. It cannot be expected that Senator Johnson and others who are undertaking this struggle against monopoly control of the American air can continue their efforts without some indication of support and interest.

Your comments will be appreciated.

- D. A copy of an article from February 21st Broadcasting magazine. This story makes it clear that NAB, which previously did not declare itself on one side or the other on the clear channel question, is apparently about to speak for the clear channels.

It may be of interest to note in connection with this story that the argument about collapse of NARBA is simply an untruth. Johnson, as Chairman of the Senate Committee to which the FCC is directly responsible, has been in personal communication with the deputy commissioner of communications in Mexico and the commissioners of communications in both Canada and Cuba. All three agree that 50,000 watts is a logical power ceiling.

This argument about keeping I-A stations to protect the U. S. in international conferences is simply an old chestnut called forth by the C.C.B.S. Duplication of clear channels as a domestic act within the continental limits of the United States need have no effect whatsoever on international treaty making. If channels are designated I-A in international treaty, and the United States chooses to duplicate them within its own borders, no confusion need ensue.

RICHARD B. BULL
PRESIDENT

NATIONAL ASSOCIATION OF EDUCATIONAL BROADCASTERS
Radio Station WOI, Hdqrs.
Ames, Iowa

March 8, 1949

TO OFFICERS AND DIRECTORS:

A number of requests have now come in that the NAEB prepare a plaque or shingle or membership certificate of a type which could be framed.

I think the time has come for action on this, and I am requesting you to submit ideas for what you think would be appropriate.

It is possible to have this done rather inexpensively here.

RICHARD B. HULL
PRESIDENT

vs

From BROADCASTING Magazine

February 21, 1949

NARBA RESCUE IS GOAL OF NAB PROJECT

An immediate conference with FCC and congressional committee chairmen to avert collapse of NARBA will be held by NAB officials. The action will be taken under mandate of the NAB board as a result of "unsettled conditions" cause by failure of FCC to solve the clear-channel problem.

Delay in resolving the clear-channel issue prevents the State Dept. from forming its policy in preparation for the NARBA meeting in Canada next September, it was felt by the board.

Collapse of NARBA would mean unrestricted pirating of domestic channels by other nations, the board was informed at its New Orleans meeting. These channels would include local, regional and clear facilities. The result would be degradation of service to the American listener and perhaps "chaos" in the industry, the worst in a decade-and-a-half. Other nations would pounce on U. S. frequencies at will and create intolerable interference, the board was told.

The board directed that its NARBA committee, with several engineering members, confer at once with Sen. Edwin C. Johnson (D-Colo.) and Rep. Robert Crosser (D-Ohio), chairmen, respectively, of the Senate and House Interstate Commerce Committees, as well as FCC Chairman Wayne Coy in an effort to resolve the clear-channel matter. President Justin Miller is to sit with the committee.

NATIONAL ASSOCIATION OF EDUCATIONAL BROADCASTERS

Ames, Iowa
March 21, 1949

Dear NAEBS'ers:

This is an SOS!

We've talked a lot about being of mutual service to our sister educational stations--and here's a chance for a practical demonstration. One of them needs help now--rather than next month or next year. Anyway, here's the story.

On March 10 fire totally destroyed the University of North Dakota's KFJN studios and equipment--with the exception of the transmitter which was in another building. The new control equipment, which they had worked so hard to get, was burned up. Records and transcriptions melted to a mass. Scripts, books, supplies--everything--went up in smoke. The building is a shell.

That's the picture. Everything gone! KFJN must start over from scratch! What is needed most right now is program material: scripts, phone records, transcribed programs, pertinent books, and that sort of thing. That's where we come in. Every one of us has something of this kind which can be spared. Let's pack it up--now--right away--quickly--and send it off to KFJN.

John Penn, who is in charge of the operation at KFJN, assures us that materials sent on a loan basis will be returned to the owners. However, it is desirable to make an outright gift of as much as you can. Send the stuff to John at KFJN, University of North Dakota, Grand Forks, North Dakota.

Now, how much can you do? That is up to you to decide. Before you make up your mind, just pause for a moment and look at your physical plant. Suppose all that should suddenly go up in a red glow. What would you like to have the other fellow do for you?

OK--time for action! Let's go!

Cordially,

Richard B. Hull
W. I. Griffith

W. I. Griffith, Treasurer

Richard B. Hull, President

March 21, 1949

Mr. Richard B. Hull, Manager
Station WOI
Iowa State College
Ames, Iowa

Dear Dick:

This letter is in response to your request for reaction to the proposal of Reverend R. Alton Reed, of the Baptist General Convention of Texas, to ask the Federal Communications Commission to permit churches to operate low-power FM stations on the frequencies set aside for education.

I think we ought, rather than to oppose this proposal, to suggest instead that a number of definite restrictions be placed on such broadcasting. In other words, that the churches be encouraged to use these frequencies if they can meet certain standards that would operate in the "public interest, convenience and necessity." It would be possible for the Commission to spell out standards that would safeguard the use of these channels from misuse. I think the NAEB might well get together a committee to propose what such standards might be. I would suggest some of the following:

1. That the broadcasting be principally of an educational nature rather than of evangelism. The churches have an educational program and call it "religious education" so that the FM station might well be thought of as a part of the educational arm of the church.

2. The broadcasts should be of a general religious education nature with no attacks permitted on other faiths or denominations. In other words, the kind of attacks upon other branches of the church that is characteristic frequently of so-called "fundamentalist" groups would not be permitted. A general educational program toward better religious living would be encouraged.

3. Provisions for the discussion of controversial issues should be similar to those that operate in the case of regular radio stations. If a station finds itself a party to a controversial matter, it must give equal time for reply as is now the general case.

4. Engineering standards should be similar to those that have been set up for other low-power stations. This, I believe, is a good deal lighter than the requirements for regular FM stations but there is still a safeguarding of engineering standards. I do not believe the commission should remove standards in the way indicated in Mr. Reed's proposal.

5. I would not encourage the matter of shared time between church stations and school stations. It would seem to me that this would have bad implications. Certainly educational AM stations in the past have had their trouble with shared channels and we do not want to duplicate those mistakes. When there is a contest for limited frequencies in a community, the group that could make the best case for using the facilities should receive the facilities.

There are probably other and better standards that could be developed by an NAEB committee which would safeguard these channels from exploitation and careless use. Other than that, I see no real objection to letting these channels be utilized by religious groups. I would assume, of course, that a standard would be included which would interpret "non-commercial" to mean that solicitation of funds over the air was banned.

These are offhand reactions, but I trust they may be helpful.

Sincerely,
/s/ I. KEITH TYLER

TO: All Active and Associate NAEB members
FROM: Richard B. Hull, President
RE: Semi-annual business meeting at Ohio Radio Institute

NAEB will hold its mid-year meeting of members, officers, and directors at the Ohio Institute for Education by Radio. The Columbus meeting this year will be May 5-8 inclusive or Thursday, Friday, Saturday and Sunday.

NAEB directors have this year recommended a more formal mid-year session at Columbus with sufficient time set aside to handle a number of pending business items (such as the question of FCC grants to church groups on the educational FM spectrum). Hence time has been reserved for two sessions:

1. Business meeting at 2:00 to 5:00 p.m. Thursday, May 5
2. Luncheon meeting 12:00 to 2:00 p.m. Friday, May 6

Directors and officers are especially urged to be present at the Thursday meeting. All major business will be handled at this session and only carry-over items discussed at the luncheon.

Both meetings have been arranged so as not to conflict with AER, School Broadcast Conference, and other special luncheons and business meetings for the benefit of those NAEB members who hold membership in related groups.

TO: All Officers and Directors

FROM: Dick Hull

1. Enclosed is a copy of a letter from Keith Tyler at OSU which seems to me to explore this religious SM situation pretty well. Plans are now to make this a major item of discussion at the Columbus business meeting. Movik has talked to Everett Parker of the Joint Religious Committee who can help us clear up this situation. Parker will be on hand at Columbus.
2. Apparently some correspondence has been mislaid in this office. I need re-confirmation on some director votes as noted below. If you have voted, please vote again:
 - A. Annual meeting dates -- vote for one -- circle your choice
 October 9-10-11 October 16-17-18 October 23-24-25
 - B. Membership for WCAT, South Dakota Schools of Mines (Yes) (No)
 - C. Membership for Reorganized Church Latter Day Saints (Graceland College)
 (Yes) (No)
 - D. Proceed with plans for NAEB membership plaque and have several samples prepared for choice and approval of directors. (Yes) (No)
 - E. Are you keeping in contact with your Congressmen in re Census Bill HR 1958?
 (Yes) (No)

Will you list those in following space who indicated support?

STATE _____ Names:

- F. Clear channel decision will apparently be made by May 1 by the FCC, not the Senate. Imperative we know status of your activity with senators and congressmen. Will you use reverse side of this sheet to answer the following questions:
 - (1) Your state and station? (a) A list of your senators and congressmen?
 - (2) Have any clear channel contacts been made by you with them in re Johnson Bill and general situation?
 - (3) Please designate responses from them as follows: "No Response"
 "Favorable"
 "Against"
- G. Do you want an NAEB exhibit at Columbus meeting? (Yes) (No)

Will appreciate any suggestions you may have re business items for the Columbus meeting.

FEDERAL COMMUNICATIONS COMMISSION
Washington 25, D.C.

April 8, 1949

Mr. Richard B. Hull, President
National Assn. of Educational Broadcasters
WOI, Iowa State College
Ames, Iowa

Dear Mr. Hull:

Thank you very much for your letter of April 4 and the copy of your March NAEB News Letter.

I want to wish you luck in your efforts to open a Washington office and your efforts in general to promote educational broadcasting.

As you probably know, I am going to speak at the Institute for Education by Radio on Thursday night, May 5, and I will look forward to seeing you there.

Sincerely yours,

/s/ WAYNE COY

Chairman

April 6, 1949

Mr. Wayne Coy, Chairman
Federal Communications Commission
Washington, D. C.

Dear Mr. Coy:

I am enclosing a copy of our March M.S. News letter and calling your attention to the first article which represents the organization's point of view with respect to encouraging FM growth in the educational field. I know this coincides with your own opinion and your several very eloquent expressions of that opinion in the Sigma Delta Chi magazine, the Quill, at the Indiana Radio Conference, and several other places.

The NABE, as you may realize, has been bending every effort the last two years to strengthen its ranks, to increase its membership, and to collect sufficient moneys so that we can be adequately represented in Washington with an office which would offer in addition to our present very able legal representation by Mr. Marcus Cohn of Cohn and Marks, an engineering and program advisory service to colleges and universities.

We feel we have made progress, although we realize an infinitely greater amount is still required. One of our concerns is that all the agencies associated with educational broadcasting, such as the U. S. Office of Education, etc., try to coordinate their efforts with us, and we are still looking for a "Godfather" who can help us to increase our service with some sort of a grant. One of the concerns we have, and one of the things for which we are seeking out money, is the problem of the many city school districts and small colleges who are considering quite seriously entrance into us and who have even made some preliminary plans, but who have not yet made any formal application. We hope to get some industrial aid via FM manufacturers to "smoke out" these people.

I should like to advise you that our Board of Directors and members are considering very seriously the whole question of the entry of religious groups into broadcasting on 10 watt low power transmitters in the educational FM band. We have called a mid-year meeting at the Ohio Radio Institute in Columbus where this will be a major item of business and, following that, will present our point of view for the Commission record. This situation has many implications, both good and bad, for educational groups and for religious groups, and while we do not wish to assume a "dog in the manger" attitude, we do want to present a very clear statement on these issues.

Yours sincerely

Richard B. Hull

Richard B. Hull

c.c. - Marcus Cohn
Officers and Directors, NABE

NATIONAL ASSOCIATION OF EDUCATIONAL BROADCASTERS

Ames, Iowa
April 1949

TO: Station active members only and Officers and Directors

1. We recently had a program experience at WOI which might have resulted very unfortunately. The groups involved were the International Council of Christian Churches and the American Council of Christian Churches. These groups are respectively the international and national sections of a dissenting fundamentalistic group who are comprised of such bodies as the "Bible Presbyterian Church", the "Campus" Baptist church, etc. In other words, these groups retain the title of the parent church but are something quite different.

Our contact with them came through the "American Council" when their local secretary telephoned us saying the president of the International Council of Christian Churches, Rev. Carl A. McIntire, Pastor of the Bible Presbyterian Church, was making an Iowa tour, identified him as the president of the International group which met in Amsterdam, Holland, last year and requested permission for him to broadcast. This was granted.

Subsequently I learned from the chairman of the local ministerial council that this group, the International Council of Churches, spent much of its effort in trying to tear down the Federal Council of Churches whom they rail at as being Communistic, and secondly that their Amsterdam meeting was called on the spur of the moment and met two days ahead of the formal and well-known meeting of the World Council of Churches, which was so well reported by NBC, CBS, etc.

Their approach, their letterhead, etc., all tend to imply that THEIR meeting was the bonafide meeting, and that the World Council represented by the Federal Council from the U.S. and planned ahead for several years and representing most of the major church groups was the "fly-by-nite." Many stations have "bitten" on this lure, because nearly everyone assumes these are the true Amsterdam representatives.

On learning that they might want to spend any and all program time in attacking the Federal Council as "Communistic" I checked with the American Council Secretary in Iowa who finally admitted such was their intention, whereupon I told him unless he changed his mind he had better stay home. Then ensued one of these "free speech" arguments, which was finally resolved by letting them appear, not in an address but in an interview where their statements could be challenged.

This group is well-financed, vigorous, and fanatic. It would be well for any program director to double-check any representative they may send around to avoid subsequent trouble from either permission to broadcast or denial.

#2

2. Attached is an opinion from our counsel, Marcus Cohn of Cohn and Marks in re the so-called AVCO license renewal procedure issued as a proposed ruling by the FCC.

The question of whether or not educational AM stations should oppose the ruling was raised by James Miles, director WBAA, Purdue University.

All NAEB AM stations should study the provisions of this proposed rule (not yet made official) for the reason stations will have to begin license renewal procedure four months ahead of expiration and will also have to advertise in local papers the fact of their application for renewal.

Enc.

NATIONAL ASSOCIATION OF EDUCATIONAL BROADCASTERS

May 10, 1949

Mr. T. J. Slowie, Secretary
Federal Communications Commission
Washington, D. C.

Dear Mr. Slowie:

At the mid-year meeting of the National Association of Educational Broadcasters in Columbus on May 8, 1949, the directors and officers passed the following resolution with the request that it be forwarded to you for your attention and for the FCC record.

"The National Association of Educational Broadcasters commends the Federal Communications Commission for the ruling which permits operation of low power 10-watt transmitters on the educational FM band. This ruling affords increased opportunities for community service through universities, colleges and public school systems to enter the educational and public service broadcasting field.

"Since no frequencies have been reserved for education in AM radio and television, and since the possibility of 10-watt operation is a very recent development in which educational institutions are showing encouraging interest, NAEB:

1. Urges the Federal Communications Commission to hold to its present high standards in licensing this facility.
2. Opposes any policy which would divert any portion of the twenty-channel educational FM band for assignment to any other than accredited educational institutions.

"The sole assurance for American education of communication outlets in the future rests in the electronic natural resources which the noncommercial educational FM spectrum provides and which the Commission with commendable foresight has reserved for this purpose."

We should appreciate your interest in and attention to the matter as we have appreciated the previous courtesies and considerations extended by the FCC to educational broadcasters in the United States.

Yours sincerely,

Richard B. Hull

Richard B. Hull
President

c.c. - Members of the Federal Communications Commission

NATIONAL ASSOCIATION OF EDUCATIONAL BROADCASTERS

May 10, 1949

Hon. Frieda B. Hennock
Federal Communications Commission
Washington, D. C.

Dear Commissioner Hennock:

It was a pleasure to meet you and to have the opportunity of discussing some of the problems of educational broadcasting with you at the Ohio Institute for Education by Radio.

The members of the National Association of Educational Broadcasters especially appreciated the fact that you were able to be present at our luncheon and the remarks which you made at that time.

I thought you might be interested in having a copy of the resolution which the NAEB passed on May 8 with respect to low power 10-watt FM broadcasting in the educational band.

I think the resolution is self-explanatory, but I might further underscore its significance by saying that the membership and Board of Directors felt very definitely that the preservation of the twenty educational channels is highly important for the future of American educational broadcasting. Furthermore, they made a very definite distinction between "10-watt low power broadcasting in FM" and the "fired wireless" or "campus station" laboratory broadcasting in which so many colleges and universities engage. The 10-watt FM station, it was felt, offers an opportunity at reasonable cost for many institutions to make the first step on a permanent broadcasting plan, whose facilities will later be expanded both in terms of wattage and scope of operation.

Yours sincerely,

Richard B. Hall
President

VB
enc.

a.c.c. - Officers and Directors

NATIONAL ASSOCIATION OF EDUCATIONAL BROADCASTERS

May 10, 1949

Hon. Frieda E. Hennock
Federal Communications Commission
Washington, D. C.

Dear Commissioner Hennock:

The NAEB directors requested I write to you with respect to the proposed FCC rules governing the operation of the so-called "wired wireless" or "campus stations."

I know that you had an opportunity to hear some of the discussion at the campus station meeting on Saturday afternoon and to hear of the concern of these young people for preserving this facility.

Earl Hinderman heard a portion of the discussion but did not hear the summary and remarks which I made with respect to the NAEB attitude.

The NAEB does have a great deal of sympathy with this realistic laboratory project which so many young people are operating in so many colleges. This is the NAEB position:

1. The NAEB wishes to encourage the continued existence of "wired wireless" or "campus stations" under proper regulation and licensing so as to prevent interference with regular broadcasting.
2. The NAEB wishes to make completely clear the distinction between its AM and FM member stations and "campus radio." NAEB stations are regularly licensed AM or FM stations which differ from commercial outlets only in the fact they do not sell time and their program content consists primarily of educational and cultural material rather than entertainment. They "extend the borders of the campus to the boundaries of the state."

The "wired wireless" or "campus station", however, serves the student community only and is essentially a laboratory project wherein students practice and learn skills for future professional broadcasting jobs either in educational or commercial radio stations.

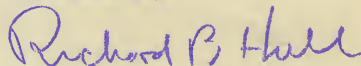

3. In many instances, such as the University of Southern California, the "wired wireless" station is that laboratory and screening agency which pre-trains students for participation in the University station, KUSC, or in some downtown station in Los Angeles. Thus with respect

May 10, 1949

to the public, KUSC is no different than KFI with the exception that it dispenses educational and cultural entertainment to Los Angeles rather than commercial programs.

In view of the foregoing, NABB wishes to urge the preservation of the "campus radio station" but to make it clear it agrees fully with the intent of the Commission to properly regulate these laboratories from an engineering standpoint, and to further make clear the fact that a "campus radio station" is "education or training for radio" and that the university station proper is for the purpose of providing "education by radio."

Yours sincerely,

Richard B. Hull
President

P.S. By the way, I never congratulated you on the excellent promotion piece, "Sharing Ideas Through Radio".

NATIONAL ASSOCIATION OF EDUCATIONAL BROADCASTERS

Ames, Iowa

September 8, 1949

TO: All NAEB Members
FROM: Richard B. Hull, President
RE: A Good Buy in FM Equipment

Ellis Atteberry, General Manager of WJBC and WJBC-FM writes me the following letter:

"We are buying all new equipment for our new 3 kw FM operation and have our present 250 watt FM equipment up for sale.

Since this equipment will enable a school to begin operation at a saving, Art Stringer of NAB suggested that we send a description to you.

The equipment has been in use for 28 months. Total cost new over \$7500. We are willing to sell it for half price.

The equipment includes REL model 549A-DL transmitter, 600R frequency monitor, 600 AMPR monitor amplifier, 623R program amplifier, 643R pre-emphasis unit, 644R power supply, Andrew folded quadrupole antenna, 200 foot Lehigh self-supporting tower, 325 feet RG/20-U coax, two sets of tubes.

The equipment will be available approximately October 1. We will sell either equipment or tower separately.

Inquiries should be directed to our Chief Engineer, Ted Bailey, WJBC, Bloomington, Illinois."

Graydon Ausmas, Manager of WUOA, University of Alabama, and Director of NAEB Region II secured a similar bargain through an alumnus of the school. Some commercial operators who have decided not to proceed with FM have these perfectly good deals. You might want to keep your eyes on this sort of thing if you are just moving into FM.

September 16, 1949

Dear NAEB Member:

Here's another questionnaire!

You probably dislike filling out these things just as much as I do. But, when Dick Hull asked me to gather some budget data for the NAEB meeting next month, I was glad to take on the project--despite my feeling that too many people send out too many questionnaires gathering too much data about too many unimportant subjects!

But this questionnaire has at least one distinctive feature: it deals with a subject of interest and importance to every station manager--comparative budget data.

The attached questionnaire should be self-explanatory. I've tried to include most of the positions to be found at NAEB stations. Space has been left for you to add any I may have missed. If your staff setup combines some of these positions, please show that in your reply. In other words, don't hesitate to add, subtract, or alter this form if thereby your answers are made more meaningful.

Needless to say all the data you send me will be held in strict confidence. It will be processed for distribution just to NAEB members. References to individual stations will be by code letters only.

Will you help me by filling out this questionnaire, and returning it to me as soon as possible?

See you at Ann Arbor!

Yours sincerely,

Burton Paulu

Mr. Graydon Ausmus, Director
Radio Broadcasting Service
Radio Station WUOA
University of Alabama
University, Alabama

Dear Graydon:

Thanks for the September 10 copy of your letter to Schooley.

You are quite right in your prodding. By now you will also have received, under separate cover, a copy of the Ford Foundation letter which indicates why some of my energies have gone with another kind of prodding.

I wish you would collect as many ideas of your own as possible for an "interior" transcribed net in the event our large scale plans run into hazards.

If you could possibly come to Ann Arbor a day early it would have a great deal of merit, as we are going to have one heck of a lot of business; and if we can get rolling before the general meeting, it will certainly help.

Yours sincerely,

Richard B. Hull
President

September 30, 1949

Mr. Richard B. Hull
Radio Station WOI
Iowa State College
Ames, Iowa

Dear Dick:

I have not answered your various communications for the last three weeks because I have been speaking all over the state to Alabama Federation of Womens Clubs in the interest of organizing radio councils and promoting a series of thirty minute weekly broadcasts which will be correlated with the club study work of the federated clubs of the state.

I took up the matter of an appearance at the TV hearings with my dean and he and I were of the opinion that the statement which the president sent for your brief on that subject was as far as we could go at the present time and there would be little point in our sending a representative. Yesterday, however, as the result of a letter from Dr. Bevis, our president asked us to review our stand on it and advise him. I am hoping to get a reaction from our committee by Monday and will let you know immediately if we wish to have a representative at Washington. I still think the answer will be no.

In your honest opinion, would it help the NAEB TV presentation for us to send a man up there unless that man could say "we definitely expect the University of Alabama to own and operate its own TV station within the next five to ten years."

About the transcribed net--I feel that we should go ahead with plans for that net on as many stations as we can as soon as possible. It will indicate to the Ford Foundation that we are trying. If we got money from the Foundation, then this activity can be absorbed within the Foundation plan. Apparently everybody is too busy in starting their fall schedule to react to my letters on this subject, however.

I shall be in Ann Arbor on Friday if at all possible. I have a Thursday morning date in Birmingham which I cannot cancel and I have not been able to work out a schedule which will get me out of Birmingham Thursday noon and into Ann Arbor earlier than Friday noon. In any event, I shall see you in Ann Arbor as soon as possible.

Yours very sincerely,

Graydon Ausmus, Director
Radio Broadcasting Services

GA/ns

P.S. We should have WUOA(FM) rolling by the first of November.

October 5, 1949

Department of State
The United States National Commission for UNESCO
Washington 25, D. C.

ATTENTION: Mr. Howard F. Vickery
Assistant Director
UNESCO Relations Staff

Dear Mr. Vickery:

Thank you for your August 16 letter referring to the youth programs recorded by UNESCO in Europe and the advice given you by Mr. Don Sullivan of the National Social Welfare Assembly that many NAEB stations will be glad to use them.

I am enclosing a list of our stations and members. Many of the call letters listed, I am sure, would be interested.

In view of the state of finances of most of those stations, I think that you will find the recordings should be offered free rather than to carry a charge or else the program usage will fall off materially.

Please forgive my long delay in reply. This letter had been mislaid in my office, and only yesterday had come to my attention.

Sincerely yours,

Richard B. Hull
President

P.S. Please feel free to call on either Siegel or Novik in New York for any further suggestions.

ap

MAEB
October 25, 1949

Mr. I. Keith Tyler, Director
The Institute for Education by Radio
The Ohio State University
Columbus 10, Ohio

Dear Keith:

It was very nice to see you again at Michigan and Chicago. I am sorry we didn't have more time to talk. I am now fulfilling my formal obligations with respect to your September 10 letter in regard to the Institute.

My reactions:

1. I do like the idea of having an Institute discussion leader and think Ken Bartlett did a wonderful job.
2. I do like the plan of shorter interest group sessions. Some of these, notably the agricultural, have dragged on interminably. I thin some directions, if this could be done, as to how to produce a discussion group program might be in order for several, including the agricultural. This was notably sour because of the extreme amount of time spent on playing over platters for what seemed time on end.
3. I suggest heavy emphasis on television with the effort to develop a perspective and a framework in which people can think; e.g., radio is not doomed but may well take a distinct second place within the next five years. It roots will be strong, however, in all agricultural and sparsely populated areas, especially the great west. Why not something on closed circuit television for schools; and above all, if this is pursued, do not get the DuMont boy who was at Allerton House. We need better brass and higher intelligence. How about getting Donald Horton from Chicago University, a hot spot on the show? He is almost good enough to be a lead speaker at the Institute. On the deep implications of TV with respect to our society, aggressions, voyeurism, etc.

Mr. I. Keith Tyler

Page two

October 25, 1949

4. I don't know quite how to phrase this, Keith, but somewhere someone should give the Allerton House Report. Secondly, in a general session there should be an opportunity to clear up once and for all what educational broadcasting is in terms of facilities---our stations are not wired wireless stations. This is the smallest part of the problem. What I mean to suggest is indicated in the enclosed letter to Alice Levitin, which letter is the same I furnished to Judith Waller as a clarification base for the education section in her book revision. Another general section idea might be somebody like Skornia who may have the follow up on your own earlier report on education in Germany.

Another area which deserves a general session emphasis is the whole business of United Nations, UNESCO radio and mass communications clarification; to know exactly what I mean it may be worth your while to spend an hour with Kay Lardie, Judith Waller, and Justin Miller. For once, I think, you and I and all of them, and maybe even David Samoff, would be in agreement. The library and museum people to my mind have made mockery of whatever mass communications means.

5. Ed Helman should be used as one of your special people and could, I think, give an awfully nice go on what school broadcasting should be. Seymour Siegel could give you an excellent go on how the educational and public service radio station should be promoted. Irving Merrill could conduct a very useful session combining effective university broadcasting with student training in connection with the radio department.

Other suggestions may occur to me later.

Sincerely,

Richard B. Hull
Director of Radio

P.S. How about a session where you would get all of the foreign radio representatives such as BBC, etc. together in a composite of what they are honestly trying to do (selfishly) and, also, what they can do in terms of genuine cooperation and cultural interchange on the international level.

November 4, 1949

Mr. Richard B. Hull, President
National Association of Educational Broadcasters
Radio Station WOI
Iowa State College
Ames, Iowa

Dear Dick:

A report is due you on several matters which were referred to me in the Ann Arbor meeting of the N.A.E.B. I am sending a copy of this letter to each member of the Executive Committee. Let me deal with the items seriatim.

- (1) Copies of the Allerton Report. In Ann Arbor I was asked to investigate the possibility of our running another 1000-odd copies of the Report so that it might be sent to the top men in all educational institutions. Here are the facts at this end. Our mimeographing service is so overwhelmed with work at this time that it would probably be mid-December before we could get the run done. Wilbur is sympathetic to the proposal, but our budget situation would force us to forego some other important use for the \$200 which the paper for the run would cost. I have checked the condition of the stencils (which have been used twice already) and am advised by the head of our stenographic service that they will still yield 700-800 clear copies before they begin to deteriorate seriously. Perhaps some of the Executive Committee members could have the stencils run. I would be happy to mail them to anyone who could. Since Siegel is willing to contribute the stamps, can anyone else handle the mimeographing?
- (2) The reference in Harry Skornia's letter to Hull of 10/22/49 to a survey of tape recorder brands and speeds. This survey is closely tied to the developmental work on the network idea. If Harry can and will do this survey, I would be happy if he would go ahead with it. Since the Research Committee would be responsible to the membership for this, as well as other tasks assigned to it, I would only suggest that Harry, as a member of that Committee, either distribute copies of the summary results of the survey to all members, or send it to me for that purpose.

November 4, 1949

FOR INFORMATION OF

either way of handling the results would be agreeable to me.

(3) Progress on the execution of the Research Committee program for 1949-50, consisting of:

- (a) A new (and better) program log study
- (b) A survey of station policies on political, religious, and related matters
- (c) A survey of current research in radio at member institutions
- (d) Initiation of a research department in the monthly "Newsletter"
- (e) Catalogue of N.A.B.E. member facilities

I am now in a very frustrated position on this assignment. Currently, in addition to my teaching duties, I am in the beginning phase of a pilot study on why people buy TV, and view it. This study will be done in Chicago. Not until it gets underway will I be able to move into the agenda for the Research Committee. If some assistance can be obtained from a foundation, assurance would be provided that the whole job could be done well and promptly. Meanwhile, if Burton Paula could tackle, for example, item (b) on the agenda, that much could get underway. By early December, I should be able to get onto these projects with some force. Apropos the program study presented at Ann Arbor, additional copies have been requested by some of the institutions. I am having a new run of this study made and will mail them out in the near future.

- (4) Quite apart from the Research Committee's agenda, I wonder if I could help any with the preparation of the President's statement for the TV hearings. Recently I had a letter from Ed Brecher in which he mentioned several arguments we could use, and wondered if it would be presumptuous for him to address them to Dick Mull. I, of course, replied that I was sure Dick would appreciate any suggestions, especially good ones such as Ed's appeared to be. Have you heard from him, Dick?

Comments, criticisms, etc. will be welcomed on all the foregoing points.

I hope you are now fully recovered from all the excitement around Ann Arbor.

Sincerely,

Dallas

SPECIAL DELIVERY AIR MAIL

TO: ALL OFFICERS AND DIRECTORS of N.A.E.B.

FROM: RICHARD B. HULL, PRESIDENT

I would like an authorization from officers and directors in order that N.A.E.B. may support what seems to me a very worthwhile and laudible project under consideration by the Sloan Foundation.

Briefly, there is under consideration a plan whereby the University of Chicago Round Table would be used as a lever and means to create a new organization to be known as "The University Round Table Board." This new entity would consist of the radio directors and presidents of 15 participating universities across the country who would be responsible for producing a dual series of programs involving the institutions concerned on a regional basis. One series of programs totaling 52 yearly broadcasts heard once weekly would be released over NBC. The other series would be released over the 115 educational stations of the U. S.

The reason the University of Chicago is willing to consider doing this is the strong likelihood of doing more for educational radio by a larger joint effort of participating universities and, also, because there is a very strong possibility that double the amount of foundation funds can be secured to support this more comprehensive project as compared to the amount of funds presently supporting the Chicago University Round Table.

The 15 radio directors and presidents would meet twice a year for three days at Foundation expense to discuss and criticize the operation and plan program. The University of Chicago Round Table experience would be used as the base on which to build the operation.

All Officers and Directors of N.A.E.B.
Page Two
November 21, 1949

This very briefly is the plan. As you will realize, details are in the process of being worked out; and I will have more information for you later.

I need your authorization in order that N.A.E.B. may be listed as the sponsor of the enterprise.

P.S. PLEASE REGARD THIS AS HIGHLY CONFIDENTIAL AT THE PRESENT TIME.
ONE SLIP AND THIS WHOLE THING CAN TUMBLE.

PLEASE WIRE ME YOUR REPLY IMMEDIATELY.

REB-137

December 1, 1949

Mr. Richard Hull, President
National Association of Educational Broadcasters
c/o Radio Station WOI
Ames, Iowa

Dear Dick:

What the hell has happened to the NAEB? I have just read FCC Docket 9470. The Southern Baptists are moving in on the educational FM band, the Catholics are backing them up, and, so far as the record shows, there is not a chirp of protest from the NAEB or, for that matter, from a single educator or educational institution.

It looks as if a lot of blood, sweat, and tears had been shed to no purpose.

Is this a repetition of the old losing fight to hold a place for education in the AM band? The members of the NAEB should know better than anyone else what happens once the gate is opened, even though the first small opening is made in the name of religion.

It is not enough to say that the academic dodos have been sitting on their back-sides and letting the educational FM band go to waste. The band was not set aside for their personal benefit. It was set aside for the benefit of the boys and girls of this country and of the adults who want something more solid in the way of radio listening fare than is provided as a by-product of the advertising business. Dodos, even academic dodos, have a way of becoming extinct. In another generation most of them will have gone to their reward and educational radio will have a chance of doing, on a national scale, what WOI, KUOM, WEA, WILL and a handful of others have demonstrated it is capable of doing. But the chance will be gone if the educational frequencies are gone.

I have no objection to religion having its proper place on the air, but it seems to me it should seek its space in that portion of the spectrum available to the hucksters of soap, cigarettes, and Serutan, of which there are too many, rather than at the expense of educational radio, of which there is too little; and it is pretty discouraging that no educators are appearing before the Federal Communications Commission to say just that.

Sincerely yours,

(Signed) Clifford J. Durr

REH-137

December 5, 1949

Mr. Richard B. Hull
Director of Radio
Iowa State College
Ames, Iowa

Dear Richard:

I imagine you know of Docket No. 9470, the petition of the Radio Commission of the Southern Baptist Convention, for a group of low-power FM stations in the 88 megacycle band. If this petition is granted, it will mean that the educational band will be broken, and it can well mean the elimination of the special frequencies assigned to education.

The Protestant Radio Commission is filing a brief with the Federal Communications Commission, strongly opposing the granting of licenses to non-educational groups in the 88-92 m. band. I have not been able to find that any educational organization has come forward to oppose the applications of the Southern Baptist Convention. It seems to me all persons interested in educational broadcasting should make representations to the Federal Communications Commission concerning these applications. I know it is a bother, but those of us who believe in this business must take the time to fight for it.

Do you or your organization intend to take any action regarding this application? I will appreciate it if you will let me know what stands you propose to take.

Sincerely yours,

(Signed) Everett
